

High precision metal tubes

Providing solutions to difficult manufacturing problems.

FOCUS

Pioneering pipes, from thick pipes to thin pipes of any material

KAKOH

Overview

Kakoh Co.,Ltd. was established in 1964 as EDM pipe electrode manufacturer for electric discharge machining small hole pipe electrodes. Since then our products are widely spread. We always try to propose further solution to our clients. We can manage any pipe of different thickness: thicker pipes and extremely thin pipes are produced to meet your requirements. This time, we will propose our products mainly for semiconductor field and medical field.

● Case study in innovation

1. EDM Accessories (Copper&Brass)

3. Pipe second stage processing (superfine bent tube, graded pipe etc.)

4. Stainless steel pipes, Titanium pipes

2. Thin(Thick) Small Stainless steel seamless tube coil

5. PBT tube etc.
